Education

Presidency College

2021 – 2023

Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College

2018 – 2021

Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College

2016 – 2018

Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist

Jun. 2024 – Jan. 2026

Amazon FBA

Bengaluru, India

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, translating high-volume case review into access governance mindset and exception documentation.
- Investigated seller claims, identifying policy violations and anomalous patterns, escalating findings to senior reviewers
- Maintained audit-ready case documentation with findings, decisions, evidence notes, and corrective actions aligned to evidence documentation and decision trails.
- Spotted recurring fraud patterns across 200+ weekly cases and flagged repeat issues early, reducing investigation cycles before escalation.

Projects

SOC Automation and Threat Detection Lab |

Python, Splunk, Wireshark, Nmap, MITRE ATT&CK

- Deployed Splunk SIEM with SPL correlation (detection engineering) searches for brute-force detection and lateral movement, mapped TTPs to MITRE ATT&CK (TTP mapping).
- Built automated SOAR (security orchestration and automation)-style detection pipeline using Python, ingesting Splunk alerts, running IOC enrichment (threat intelligence) via VirusTotal API, and dispatching Telegram notifications with severity classification.
- Converted detection logic to Sigma rules (detection-as-code) and performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling, and plaintext credential exposure on unencrypted sessions.

Vulnerability Scanner and Patch Prioritization Engine |

Python, Bash, Nessus, OpenVAS, NVD API

- Built automated vulnerability assessment pipeline integrating Nessus and OpenVAS REST APIs in Python, generating CVE reports classified by CVSS severity (vulnerability prioritisation).
- Developed OWASP Top 10 (web application security) automated web checker that sends crafted HTTP requests to detect injection, broken auth, and SSRF vulnerabilities, documenting SQL injection exploit and parameterised query remediation.
- Automated scan scheduling via Bash and cron, building delta-scan logic to flag newly discovered CVEs and organizing patch compliance (remediation tracking) tracking evidence.

Technical Skills

Network Security: Splunk, Wireshark, Nmap

Threat Detection: MITRE ATT&CK, Sigma rules, VirusTotal API

Vulnerability Assessment: Nessus, OpenVAS, CVSS, EPSS

Automation: Python, Bash, SOC Automation

Incident Response: Python, Bash (basic), regular expressions, linux

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
