Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 – 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 – 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 – 2018

Work Experience

Support Operations Specialist <i>Amazon FBA</i>	<i>Jun. 2024 – Jan. 2026 Bengaluru, India</i>
• Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured case triage and escalation workflows, with 100% case triage adherence to senior reviewer guidelines. • Investigated seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, resulting in 95% of cases being resolved within 3 days. • Maintained audit-ready case documentation recording investigation findings, decisions, evidence notes, and corrective actions, with 99% of documentation meeting senior reviewer quality standards. • Detected recurring fraud patterns across 200+ weekly cases and flagged them early, reducing repeat-issue investigation time by 30% before escalation to senior reviewers.	

Projects

Vulnerability Scanner and Patch Prioritization Engine	<i>Python, Bash, Nessus, OpenVAS, NVD API</i>
• Rewrote automated vulnerability assessment pipeline integrating Nessus and OpenVAS REST APIs in Python; generated CVE reports classified by CVSS severity and EPSS context from the FIRST.org API. • Developed OWASP Top 10 automated web checker that sends crafted HTTP requests to detect injection, broken auth, and SSRF vulnerabilities; documented SQL injection exploit and parameterised query remediation. • Automated scan scheduling via Bash and cron; built delta-scan logic to flag newly discovered CVEs and organize patch compliance tracking evidence.	
SOC Automation and Threat Detection Lab	<i>Python, Splunk, Wireshark, Nmap, MITRE ATT&CK</i>
• Deployed Splunk SIEM with SPL correlation searches for brute-force detection, lateral movement, and privilege escalation; mapped TTPs to MITRE ATT&CK and wrote PICERL incident report. • Built automated SOAR-style detection pipeline: Python script ingests Splunk alerts, runs IOC enrichment via VirusTotal API, and dispatches Telegram notifications with severity classification. • Converted detection logic to Sigma rules for vendor-neutral SIEM use; performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling, and plaintext credential exposure on unencrypted sessions.	

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
