Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage workflow to enforce security policy compliance and support cloud access governance.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, reinforcing the security incident escalation process.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, establishing a secure documentation trail for cloud compliance audits.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force, lateral movement and privilege escalation detection, mapped TTPs to MITRE ATT&CK and produced a PICERL incident report.
- Created Python script that consumes Splunk alerts, enriches them with MITRE ATT&CK context and generates severity-classified alert files.
- Translated detection logic into portable SPL queries and captured network traces with Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure, resulting in a Wireshark capture file.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Engineered Python workflow that calls Nessus and OpenVAS REST APIs, aggregates findings and enriches them with NVD API data to produce a CVE report.
- Implemented Python script that sends crafted HTTP requests to target endpoints, parses responses for injection patterns and documents SQL injection exploit in a remediation guide.
- Scheduled vulnerability scans with Bash scripts and cron, added delta-scan logic to identify new CVEs and compiled patch compliance tracking evidence.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, IDS/IPS, AWS (IAM, CloudTrail, GuardDuty), cloud security posture

Automation: Python, Bash (basic), boto3, regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
