Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured security triage, escalation and decision workflows; output: daily case triage report.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for security review; output: escalation docket.
- Maintained audit-ready documentation of investigation findings, decisions, evidence notes and corrective actions, ensuring traceable security records; output: compliance audit log.
- Spotted recurring fraud patterns across 200+ weekly cases, flagged them early to reduce repeat-issue investigation time before escalation; output: pattern alert register.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force attempts, lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK in a PICERL incident report.
- Developed Python automation that consumes Splunk alerts, enriches IOCs using internal feeds, applies severity classification based on MITRE ATT&CK and records the results in a Splunk enrichment log.
- Translated detection logic into Sigma rules for vendor-neutral deployment and performed packet analysis in Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure, producing a detailed analysis report.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built Python pipeline that submits suspicious URLs and IPs to VirusTotal and AbuseIPDB, enriches each record with WHOIS registration data and outputs a consolidated threat intelligence JSON file.
- Implemented a Python typosquatting detector that generates character-substitution variants of brand domains, queries WHOIS for registration details and compiles findings into a detection report.
- Created a Telegram bot in Python that accepts analyst-submitted URLs, routes them through the threat intelligence pipeline and returns enriched IOC data as CSV output for incident response.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
