Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 – 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 – 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 – 2018

Work Experience

Support Operations Specialist Amazon FBA	Jun. 2024 – Jan. 2026 Bengaluru, India
--	---

- Analyzed repeat case issues to identify process gaps, severity patterns, and remediation priorities.
- Investigated policy exceptions to identify root causes, risk impact, and corrective actions.
- Triaged cases by severity and eligibility, supporting prioritization of high-risk exceptions.
- Documented findings and corrective actions to support remediation tracking and review evidence.

Projects

Vulnerability Scanner and Patch Prioritization Engine	<i>Python, Bash, Nessus, OpenVAS, NVD API</i>
- Built automated vulnerability assessment pipeline integrating Nessus and OpenVAS REST APIs in Python; generates CVE reports classified by CVSS severity (vulnerability prioritisation); implemented EPSS scoring (exploit probability scoring) from FIRST.org API to prioritise by actual exploit probability — a metric rarely used by freshers. - Developed OWASP Top 10 (web application security) automated web checker that sends crafted HTTP requests to detect injection, broken auth, and SSRF vulnerabilities; documented SQL injection exploit and parameterised query remediation. - Automated scan scheduling via Bash and cron; built delta-scan logic to flag newly discovered CVEs and calculate remediation SLA deadlines (Critical=24hrs, High=7 days, Medium=30 days) for patch compliance (remediation tracking) tracking.	
SOC Automation and Threat Detection Lab	<i>Python, Splunk, Wireshark, Nmap, MITRE ATT&CK</i>
- Deployed Splunk SIEM with SPL correlation (detection engineering) searches for brute-force detection (index=* failed stats count by src_ip), lateral movement, and privilege escalation; mapped TTPs to MITRE ATT&CK (TTP mapping) (T1110, T1078, T1059) and wrote PICERL incident report. - Built automated SOAR (security orchestration and automation)-style detection pipeline: Python script ingests Splunk alerts, runs IOC enrichment (threat intelligence) via VirusTotal API, and dispatches Telegram notifications with severity classification — reducing mean time to triage by automating repetitive L1 tasks. - Converted detection logic to Sigma rules (detection-as-code) (vendor-neutral format used by enterprise SOCs); performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling, and plaintext credential exposure on unencrypted sessions.	

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions, security

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
