Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured triage and escalation workflows, achieving a 98% on-time triage completion rate
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, generating 45 escalation tickets per week
- Maintained audit-ready case documentation capturing investigation findings, evidence notes, and corrective actions, sustaining a 100% audit compliance score
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force detection, lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK and wrote PICERL incident report.
- Built automated SOAR style detection pipeline: Python script ingests Splunk alerts, runs IOC enrichment via VirusTotal API and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules in a vendor neutral format used by enterprise SOCs and performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling and plaintext credential exposure on unencrypted sessions.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi API threat intelligence pipeline: submits suspicious URLs and IPs to VirusTotal, AbuseIPDB and URLScan.io and cross references WHOIS registration age, DNS records and SSL details for phishing analysis.
- Implemented typosquatting domain detector generating character substitution variants of brand domains and checking live DNS resolution for brand impersonation analysis.
- Deployed Telegram bot interface enabling analysts to submit URLs for live IOC enrichment and supports bulk CSV input output for incident response workflows and includes OSINT enrichment via theHarvester for domain profiling.
