Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, achieving consistent case routing.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for resolution.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, supporting compliance reviews.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIN, Telegram bot*

- Built multi-API threat intelligence pipeline in Python that submits suspicious URLs and IPs to VirusTotal and AbuseIPDB and URLScan.io and cross-references WHOIS registration age, DNS records and SSL details to generate a phishing analysis report.
- Implemented a typosquatting domain detector in Python that generates character-substitution variants of brand domains and checks live DNS resolution for each variant to produce a typosquatting detection list.
- Deployed a Telegram bot interface in Python that enables analysts to submit URLs for live IOC enrichment, supports bulk CSV input and output, and adds OSINT data from theHarvester to create an enriched IOC payload.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built an automated vulnerability assessment pipeline in Python that integrates Nessus and OpenVAS REST APIs, pulls CVE data from the NVD API, adds CVSS severity and EPSS context from the FIRST.org API, and produces a vulnerability assessment report.
- Developed an OWASP Top 10 automated web checker in Python that sends crafted HTTP requests to detect injection, broken authentication and SSRF vulnerabilities, documents findings and remediation steps, and outputs an OWASP compliance checklist.
- Automated scan scheduling with Bash and cron, added delta-scan logic to flag newly discovered CVEs, and organized results into patch compliance evidence.
