Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, producing audit-ready decision logs.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, generating compliance escalation reports.
- Documented investigation findings, evidence notes, and corrective actions in audit-ready case files, creating a control evidence repository for compliance tracking.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline in Python that submits suspicious URLs and IPs to VirusTotal and AbuseIPDB, cross-references WHOIS registration age, DNS records and SSL details, and outputs a structured phishing analysis report.
- Implemented typosquatting domain detector that generates character-substitution variants of brand domains, checks live DNS resolution for each variant, and produces a comprehensive typosquatting detection list.
- Deployed Telegram bot interface that accepts URLs from analysts, enriches them with OSINT data via theHarvester, supports bulk CSV input and output, and returns an enriched IOC payload for incident response workflows.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built automated vulnerability assessment pipeline in Python that integrates Nessus and OpenVAS REST APIs, retrieves CVE data from the NVD API, adds EPSS context from the FIRST.org API, and generates a consolidated CVE report.
- Developed OWASP Top 10 automated web checker that sends crafted HTTP requests to detect injection, broken authentication and SSRF vulnerabilities, documents findings in a structured vulnerability assessment file.
- Automated scan scheduling with Bash and cron, added delta-scan logic to flag newly discovered CVEs, and organized patch compliance tracking evidence in a centralized repository.
