## Education

**Presidency College** *2021 – 2023*
*Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India*

**St. Claret College** *2018 – 2021*
*Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India*

**St. Claret PU College** *2016 – 2018*
*Higher Secondary (12th) · Bengaluru, India*

## Work Experience

**Support Operations Specialist** *Jun. 2024 – Jan. 2026*
*Amazon FBA* *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, producing audit-ready compliance evidence.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, generating actionable compliance tickets.
- Documented investigation findings, decisions, evidence notes, and corrective actions in audit-ready case files, creating a control evidence repository for compliance tracking.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

## Projects

**Phishing and OSINT Threat Intelligence Tool** | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline in Python that submits suspicious URLs and IPs to VirusTotal and AbuseIPDB, cross-references WHOIS registration age, DNS records and SSL details, and generates a structured phishing analysis report.
- Implemented typosquatting domain detector that creates character-substitution variants of brand domains, checks live DNS resolution for each variant, and outputs a comprehensive typosquatting detection list.
- Deployed Telegram bot interface that accepts analyst-submitted URLs, enriches them with OSINT data from theHarvester, processes bulk CSV input/output, and returns an enriched IOC payload for incident response workflows.

**Vulnerability Scanner and Patch Prioritization Engine** | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built automated vulnerability assessment pipeline in Python that integrates Nessus and OpenVAS REST APIs, pulls CVE data from the NVD API, adds EPSS context from the FIRST.org API, and produces a consolidated CVE report with severity classification.
- Developed OWASP Top 10 automated web checker that sends crafted HTTP requests to detect injection, broken authentication and SSRF vulnerabilities, documents discovered SQL injection vectors, and creates a remediation guidance document.
- Automated scan scheduling using Bash and cron, added delta-scan logic to flag newly discovered CVEs, and organized patch compliance tracking evidence in a structured compliance tracking file.

## Technical Skills

**GRC & Compliance:** NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring
**Risk & Audit:** Risk assessment, control testing, audit documentation, vendor risk, RCSA basics
**Fraud & AML:** Transaction monitoring, AML typologies, KYC/CDD, sanctions screening
**Systems & Tools:** Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics
**Frameworks:** MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

## Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
