Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, processing 50+ cases weekly
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, feeding the senior review queue
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a standardized case file repository
- Detected recurring fraud patterns across 200+ weekly cases, flagging them early to reduce repeat-issue investigation time before escalation, shortening repeat-issue review cycle

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force attempts, lateral movement and privilege escalation, mapped TTPs to MITRE ATT&CK framework and produced a PICERL incident report.
- Created Python automation that ingests Splunk alerts, enriches IOCs with internal feeds, applies severity classification and writes results to a structured log.
- Translated detection logic into Splunk SPL queries, performed packet analysis with Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Developed Python pipeline that submits URLs and IPs to VirusTotal API and AbuseIPDB, then cross-references WHOIS registration data, DNS records and SSL certificate details for phishing analysis.
- Implemented Python typosquatting detector that generates character-substitution variants of brand domains and queries WHOIS/DNS for live resolution to identify impersonation.
- Created Telegram bot in Python allowing analysts to submit URLs, which triggers VirusTotal and AbuseIPDB lookups and returns WHOIS information, supporting bulk CSV input and output for incident response.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
