## Education

**Presidency College** *2021 – 2023*
*Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India*

**St. Claret College** *2018 – 2021*
*Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India*

**St. Claret PU College** *2016 – 2018*
*Higher Secondary (12th) · Bengaluru, India*

## Work Experience

**Support Operations Specialist** *Jun. 2024 – Jan. 2026*
*Amazon FBA* *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage, escalation, and decision workflows, producing consistent case classification
- Investigated root causes on seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, enabling timely remediation decisions
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, maintaining a searchable evidence repository
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

## Projects

**SOC Automation and Threat Detection Lab** | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force detection and lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK and wrote a PICERL incident report.
- Built an automated SOAR-style detection pipeline where a Python script ingests Splunk alerts and runs IOC enrichment via VirusTotal API and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules for vendor-neutral SOC use and performed TCP/IP analysis in Wireshark to detect SYN scans and DNS tunnelling and plaintext credential exposure on unencrypted sessions and produced a Wireshark analysis report.

**Vulnerability Scanner and Patch Prioritization Engine** | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built an automated vulnerability assessment pipeline integrating Nessus and OpenVAS REST APIs in Python and generated CVE reports classified by CVSS severity and EPSS context from the FIRST.org API.
- Developed an OWASP Top 10 automated web checker that sends crafted HTTP requests to detect injection and broken auth and SSRF vulnerabilities and documented a SQL injection exploit and parameterised query remediation.
- Automated scan scheduling via Bash and cron and built delta-scan logic to flag newly discovered CVEs and organize patch compliance tracking evidence.

## Technical Skills

**SOC Operations:** Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
**SIEM & Monitoring:** Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
**Threat Intelligence:** MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
**Systems & Networking:** Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
**Automation:** Python, Bash (basic), regular expressions

## Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
