Education

Presidency College

Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

2021 – 2023

St. Claret College

Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

2018 – 2021

St. Claret PU College

Higher Secondary (12th) · Bengaluru, India

2016 – 2018

Work Experience

Support Operations Specialist

Jun. 2024 – Jan. 2026

Amazon FBA

Bengaluru, India

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, reducing risk
- Investigated seller claims, identifying policy violations and anomalous patterns, escalating risk findings
- Maintained audit-ready case documentation with findings, decisions, evidence notes, and corrective actions aligned to risk prioritization, SLA discipline, and remediation tracking.
- Spotted recurring fraud patterns across 200+ weekly cases, reducing repeat-issue investigation time and risk

Projects

SOC Automation and Threat Detection Lab |

Python, Splunk, Wireshark, Nmap, MITRE ATT&CK

- Deployed Splunk SIEM for threat detection (anomaly detection) and incident response in risk arena, creating audit trails with decision notes and corrective actions, resulting in a comprehensive incident report.
- Developed automated SOAR (security orchestration and automation)-style detection pipeline using Python and Sigma rules (detection-as-code), performing TCP/IP analysis for detecting security threats and control gaps, resulting in a mapped MITRE ATT&CK framework.
- Built automated detection pipeline with SPL correlation (detection engineering) searches for brute-force detection, lateral movement, and privilege escalation, resulting in a PICERL incident report with risk identification and escalation priorities.

Vulnerability Scanner and Patch Prioritization Engine |

Python, Bash, Nessus, OpenVAS, NVD API

- Generated audit-ready CVE reports with CVSS severity (vulnerability prioritisation) and EPSS context, creating a risk-based vulnerability assessment for risk arena investors in Bengaluru, Karnataka, resulting in a prioritized remediation plan.
- Developed OWASP Top 10 automated compliance checker for web application security, validating security controls against regulatory requirements and identifying risk, resulting in a compliance report with risk triage and remediation tracking.
- Automated compliance scan scheduling via Bash and cron, tracking remediation progress and organizing audit evidence for patch compliance (remediation tracking) review, resulting in a comprehensive risk management report with control gap analysis.

Technical Skills

Risk Analysis: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring

Compliance Tracking: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics

Investigation and Remediation: root cause analysis, anomaly detection, corrective actions

Automation and Threat Detection: Splunk SIEM, Python, Sigma rules, threat detection pipeline

Vulnerability Assessment: Nessus, OpenVAS, CVSS severity, patch prioritization

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
