Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 - 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 - 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 - 2018

Work Experience

Support Operations Specialist <i>Amazon FBA</i>	<i>Jun. 2024 - Jan. 2026 Bengaluru, India</i>
• Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured workflows, with 100% case resolution rate. • Investigated seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, resulting in 95% accurate decision-making. • Analyzed 200+ weekly cases to spot recurring fraud patterns, reducing repeat-issue investigation time by 30% before escalation. • Documented investigation findings, decisions, evidence notes, and corrective actions in audit-ready case records, maintaining 99% accuracy and compliance.	

Projects

SOC Automation and Threat Detection Lab	<i>Python, Splunk, Wireshark, Nmap, MITRE ATT&CK</i>
• Deployed Splunk SIEM with SPL correlation (detection engineering) searches for brute-force detection, lateral movement, and privilege escalation; mapped TTPs to MITRE ATT&CK (TTP mapping) and wrote PICERL incident report using Python, Splunk, and Wireshark. • Built automated SOAR (security orchestration and automation)-style detection pipeline using Python script that ingests Splunk alerts, runs IOC enrichment (threat intelligence) via VirusTotal API, and dispatches Telegram notifications with severity classification using Python, Splunk, and VirusTotal API. • Converted detection logic to Sigma rules (detection-as-code) (vendor-neutral format used by enterprise SOCs) and performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling, and plaintext credential exposure on unencrypted sessions using Wireshark, Nmap, and Python.	
Vulnerability Scanner and Patch Prioritization Engine	<i>Python, Bash, Nessus, OpenVAS, NVD API</i>
• Built automated vulnerability assessment pipeline integrating Nessus and OpenVAS REST APIs in Python; generated CVE reports classified by CVSS severity (vulnerability prioritisation) and EPSS context from the FIRST.org API using Python, Nessus, and OpenVAS. • Developed OWASP Top 10 (web application security) automated web checker that sends crafted HTTP requests to detect injection, broken auth, and SSRF vulnerabilities; documented SQL injection exploit and parameterised query remediation using Python, Bash, and NVD API. • Automated scan scheduling via Bash and cron; built delta-scan logic to flag newly discovered CVEs and organize patch compliance (remediation tracking) tracking evidence using Bash, Nessus, and OpenVAS.	

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions, security

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
