Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, maintaining a 95% on-time escalation rate
- Investigated root cause of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, producing detailed escalation reports
- Documented audit-ready case files with investigation findings, evidence notes, and corrective actions, creating 50+ compliant records weekly
- Detected recurring fraud patterns across 200+ weekly cases, flagging them early to reduce repeat-issue investigation time before escalation, reducing repeat investigations by 30%

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force, lateral movement and privilege escalation; mapped detected TTPs to MITRE ATT&CK framework and generated a PICERL incident report.
- Created a Python automation that ingests Splunk alerts, enriches each alert with MITRE ATT&CK technique lookup, launches an Nmap scan for associated IPs and logs the results back to Splunk as an enrichment workflow.
- Translated existing detection logic into detailed Splunk SPL queries, captured network traffic with Wireshark for verification and stored the analysis in a Wireshark capture file.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built a Python pipeline that submits suspicious URLs and IPs to VirusTotal and AbuseIPDB, then queries WHOIS for registration and DNS details, outputting a structured JSON report.
- Implemented a Python typosquatting detector that generates character-substitution variants of brand domains, performs live DNS resolution checks and records any flagged domains in a list.
- Developed a Telegram bot in Python that accepts URLs or bulk CSV files, enriches each entry via VirusTotal and AbuseIPDB, adds WHOIS metadata and returns the enriched data as a CSV response file.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
