Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, achieving consistent case routing metric.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, producing actionable escalation reports.
- Documented audit-ready case files with investigation findings, evidence notes, and corrective actions, establishing a compliant documentation repository.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built an automated vulnerability assessment pipeline in Python that called Nessus and OpenVAS REST APIs, retrieved CVE data from the NVD API, and produced CVSS severity reports enriched with EPSS context from the FIRST.org API.
- Developed an OWASP Top 10 web checker in Python that sent crafted HTTP requests to probe for injection, broken authentication, and SSRF flaws, and documented findings in a SQL injection exploit report with parameterised query remediation guidance.
- Automated scan scheduling with Bash scripts and cron, implemented delta-scan logic to flag newly discovered CVEs, and generated patch compliance tracking evidence for each affected asset.

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM and created SPL correlation searches for brute-force attempts, lateral movement, and privilege escalation, then mapped detected TTPs to MITRE ATT&CK and produced incident reports using PICERL format.
- Built an automated detection pipeline in Python that ingested Splunk alerts, enriched indicators of compromise via the VirusTotal API, and dispatched Telegram notifications with severity classification for each alert.
- Converted detection logic to vendor-neutral Sigma rules, performed TCP/IP analysis in Wireshark to identify SYN scans, DNS tunnelling, and plaintext credential exposure, and documented the findings in a detection rule repository.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
