Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, producing daily triage summary.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, delivering escalation packets.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a searchable case repository for 50+ weekly cases.
- Detected recurring fraud patterns across 200+ weekly cases and flagged them early, cutting repeat-issue investigation time by 30% before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force, lateral movement and privilege escalation detection, mapped TTPs to MITRE ATT&CK and generated a PICERL incident report.
- Created Python automation that consumes Splunk alerts, enriches IOCs using internal lookup tables, applies MITRE ATT&CK mapping and writes enriched events back to Splunk for severity classification.
- Translated existing detection logic into Sigma rules for vendor-neutral deployment and performed packet analysis with Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure, outputting a Sigma rule set.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Developed Python pipeline that submits URLs and IPs to VirusTotal and AbuseIPDB, retrieves WHOIS registration data and SSL details, and returns a consolidated threat intelligence report via Telegram bot.
- Implemented a typosquatting detector in Python that generates character-substitution variants of brand domains, queries live DNS records and flags impersonating domains, logging findings to a CSV file.
- Built a Telegram bot in Python that accepts analyst-submitted URLs, performs bulk IOC enrichment using VirusTotal and WHOIS lookups, and returns enriched results in CSV format for incident response.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
