Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for further action.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a traceable evidence repository.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM and created SPL correlation searches for brute force attempts, lateral movement and privilege escalation, mapped detected TTPs to MITRE ATT&CK framework and generated a PICERL incident report.
- Built Python automation that consumes Splunk alerts, enriches IOCs with internal feeds, applies severity classification and triggers Nmap scans for host verification.
- Translated detection logic into Sigma rules for vendor neutral use and conducted TCP/IP packet analysis with Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Developed Python pipeline that submits URLs and IPs to VirusTotal API and AbuseIPDB, then cross-references WHOIS registration age, DNS records and SSL certificate details to produce phishing analysis reports.
- Created Python typosquatting detector that generates character substitution variants of target domains, queries WHOIS and DNS for live resolution and flags brand impersonation candidates.
- Implemented Telegram bot in Python that accepts URL submissions, performs live IOC enrichment via VirusTotal API and AbuseIPDB, retrieves WHOIS data and returns structured JSON for incident response.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
