Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured compliance triage and escalation workflows, producing a daily compliance case summary.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, generating an escalation report for compliance review.
- Maintained audit-ready case documentation capturing investigation findings, decisions, evidence notes, and corrective actions, creating a centralized compliance evidence repository.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline in Python that submits suspicious URLs and IPs to VirusTotal, AbuseIPDB, and URLScan.io and cross-references WHOIS registration age, DNS records, and SSL details to generate a phishing analysis report.
- Implemented a typosquatting domain detector in Python that creates character-substitution variants of brand domains, checks live DNS resolution, and produces a typosquatting detection list for brand-impersonation analysis.
- Deployed a Telegram bot interface written in Python that accepts URL submissions, enriches them with OSINT data via theHarvester, processes bulk CSV input/output, and delivers an enriched IOC package to analysts.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built an automated vulnerability assessment pipeline in Python that integrates Nessus and OpenVAS REST APIs, pulls CVE data from the NVD API, and adds EPSS context from the FIRST.org API to produce a comprehensive CVE report.
- Developed an OWASP Top 10 automated web checker in Python that sends crafted HTTP requests to detect injection, broken authentication, and SSRF vulnerabilities and documents findings in a detailed SQL injection exploit report.
- Automated scan scheduling with Bash and cron, added delta-scan logic to flag newly discovered CVEs, and organized patch compliance tracking evidence in a structured compliance tracking file.

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring

Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics

Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening

Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics

Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
