Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 – 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 – 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 – 2018

Work Experience

Support Operations Specialist <i>Amazon FBA</i>	<i>Jun. 2024 – Jan. 2026 Bengaluru, India</i>
• Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured case triage and escalation workflows. • Investigated seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers. • Maintained audit-ready case documentation recording investigation findings, decisions, evidence notes, and corrective actions. • Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.	

Projects

<u>Phishing and OSINT Threat Intelligence Tool</u>	<i>Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot</i>
• Rewrote the threat intelligence pipeline using Python, VirusTotal API, AbuseIPDB, WHOIS, and URLScan.io to submit suspicious URLs/IPs for analysis, cross-referencing WHOIS registration age, DNS records, and SSL details. • Implemented a typosquatting domain detector using Python, generating character-substitution variants of brand domains and checking live DNS resolution for brand-impersonation analysis. • Deployed a Telegram bot interface using Python, Telegram bot, and theHarvester, enabling analysts to submit URLs for live IOC enrichment, supporting bulk CSV input/output for incident response workflows and including OSINT enrichment for domain profiling.	
<u>Vulnerability Scanner and Patch Prioritization Engine</u>	<i>Python, Bash, Nessus, OpenVAS, NVD API</i>
• Built an automated vulnerability assessment pipeline using Python, Nessus, and OpenVAS REST APIs, generating CVE reports classified by CVSS severity and EPSS context from the FIRST.org API. • Developed an OWASP Top 10 automated web checker using Python, sending crafted HTTP requests to detect injection, broken auth, and SSRF vulnerabilities, documenting SQL injection exploit and parameterised query remediation. • Automated scan scheduling using Bash and cron, building delta-scan logic to flag newly discovered CVEs and organize patch compliance tracking evidence.	

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring
Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics
Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening
Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics
Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
