Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage, escalation, and decision workflows, producing a daily triage summary.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, delivering an escalation report.
- Documented audit-ready case records with investigation findings, decisions, evidence notes, and corrective actions, creating a centralized case log for compliance audits.
- Detected recurring fraud patterns across 200+ weekly cases and flagged them early, reducing repeat-issue investigation time before escalation, generating a pattern alert register.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with correlation searches for brute force, lateral movement and privilege escalation, mapped TTPs to MITRE ATT&CK framework and generated PICERL incident report.
- Created Python automation that consumes Splunk alerts, enriches IOCs using internal lookup tables, applies severity classification and triggers response actions documented in incident playbook.
- Translated detection logic into Sigma rules for vendor neutral use, performed packet capture analysis with Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure, and stored rules in version-controlled repository.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built Python pipeline that submits URLs and IPs to VirusTotal API and AbuseIPDB, retrieves WHOIS registration data and SSL details, and compiles phishing analysis report.
- Implemented Python typosquatting detector that generates character-substitution variants of brand domains, resolves them via DNS and flags active impersonating domains in detection list.
- Developed Telegram bot in Python that accepts URL submissions, performs bulk WHOIS and VirusTotal enrichment, and returns results to analysts for incident response workflow.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
