Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflows; achieved 98% triage workflow compliance
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers; sustained escalation throughput of 45 cases per day
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions; maintained a 100% audit readiness score
- Spotted recurring fraud patterns across 200+ weekly cases and flagged them early, cutting repeat-issue investigation time by 30% before escalation

Projects

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built an automated vulnerability assessment pipeline in Python that calls Nessus and OpenVAS REST APIs, pulls CVE metadata from the NVD API, classifies findings by CVSS severity and enriches them with EPSS context from the FIRST.org API.
- Created an OWASP Top 10 web security checker in Python that sends crafted HTTP requests to identify injection, broken authentication, and SSRF flaws, then documented the SQL injection exploit and the parameterised query remediation steps.
- Implemented scan scheduling with Bash scripts and cron, added delta-scan logic to highlight newly disclosed CVEs, and generated patch compliance tracking evidence for each affected asset.

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force attempts, lateral movement, and privilege escalation, mapped detected TTPs to MITRE ATT&CK, and produced a PICERL incident report.
- Built an automated detection pipeline in Python that ingests Splunk alerts, enriches IOCs via the VirusTotal API, and dispatches Telegram notifications with severity classification.
- Converted detection logic to vendor-neutral Sigma rules, performed TCP/IP analysis in Wireshark to spot SYN scans, DNS tunnelling, and plaintext credential exposure, and documented the findings in a Sigma rule set.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
