Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, achieving consistent case routing metric.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, producing actionable escalation reports.
- Documented audit-ready case files with investigation findings, decisions, evidence notes, and corrective actions, maintaining compliance record for 50+ weekly cases.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute force detection, lateral movement and privilege escalation, mapped TTPs to MITRE ATT&CK and produced a PICERL incident report.
- Created a Python script that ingests Splunk alerts, enriches IOCs via VirusTotal API and dispatches severity-classified Telegram notifications.
- Translated detection logic into Sigma rules and performed TCP/IP analysis in Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure, delivering a Sigma rule set.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Engineered a Python pipeline that integrates Nessus and OpenVAS REST APIs, generates CVE reports classified by CVSS severity and enriched with EPSS context from the FIRST.org API.
- Developed an automated OWASP Top 10 web checker that sends crafted HTTP requests to detect injection, broken authentication and SSRF vulnerabilities and documented a SQL injection exploit.
- Implemented Bash and cron-based scan scheduling with delta-scan logic to flag newly discovered CVEs and compile patch compliance tracking evidence.
