Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, supporting security incident intake process.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for security review.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a searchable security evidence repository.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built an automated vulnerability assessment pipeline in Python that calls Nessus and OpenVAS REST APIs, pulls CVE data from the NVD API, classifies findings by CVSS severity and EPSS context from the FIRST.org API, and outputs a consolidated CVE report.
- Created a Python-based web checker that sends crafted HTTP requests to identify injection, broken authentication, and SSRF issues, captured a reproducible SQL injection exploit and recorded remediation steps in a detailed guide.
- Implemented Bash scripts scheduled via cron to run incremental scans, added delta-scan logic to highlight newly discovered CVEs, and generated patch compliance tracking evidence for each finding.

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk with SPL correlation searches for brute-force attempts, lateral movement, and privilege escalation, mapped detected TTPs to MITRE ATT&CK, and compiled the results into an incident report.
- Built a Python automation that consumes Splunk alerts, enriches IOCs via the VirusTotal API, classifies severity, and sends formatted Telegram notifications to the response team.
- Translated detection logic into Sigma rules for vendor-neutral use, performed TCP/IP analysis in Wireshark to spot SYN scans, DNS tunnelling, and plaintext credential exposure, and delivered a complete Sigma rule set.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
