Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow
- Investigated root cause of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for further security analysis.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, establishing a reliable security documentation process.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force detection, lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK in a detailed incident report.
- Built a Python automation that ingests Splunk alerts, runs Nmap scans for host validation and assigns severity classification tags to each alert.
- Converted detection logic into Python scripts, performed TCP/IP analysis in Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure and documented findings in an analysis report.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Created a Python pipeline that submits suspicious URLs and IPs to VirusTotal API and AbuseIPDB, cross-references WHOIS registration data and DNS/SSL records and generates a comprehensive phishing analysis report.
- Implemented a Python typosquatting detector that generates character-substitution variants of brand domains, checks live DNS resolution and produces a list of impersonating domains.
- Deployed a Telegram bot that accepts URLs, triggers Python enrichment using VirusTotal API and WHOIS lookup, processes bulk CSV inputs and returns enriched IOC data in a downloadable output file.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
