Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, producing consistent case disposition logs.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, enabling timely security review.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a searchable security evidence repository.
- Detected recurring fraud patterns across 200+ weekly cases, flagging them early and reducing repeat-issue investigation time before escalation.

Projects

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built an automated vulnerability assessment pipeline using Python to call Nessus and OpenVAS REST APIs, retrieved CVE data from the NVD API, classified findings by CVSS severity and EPSS context from the FIRST.org API, and produced a consolidated report.
- Developed an OWASP Top 10 web checker in Python that sends crafted HTTP requests to identify injection, broken authentication, and SSRF issues, documented a SQL injection exploit and generated remediation guidance.
- Automated scan scheduling with Bash and cron, implemented delta-scan logic to flag newly discovered CVEs, organized patch compliance tracking, and recorded investigation evidence.

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force attempts, lateral movement, and privilege escalation, mapped observed tactics to MITRE ATT&CK, and authored a detailed incident report.
- Built an automated detection pipeline in Python that ingests Splunk alerts, enriches indicators of compromise via the VirusTotal API, and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules for vendor-neutral use, performed TCP/IP analysis in Wireshark to identify SYN scans, DNS tunnelling, and plaintext credential exposure, and documented the findings in a forensic analysis.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
