Work Experience

Support Operations Specialist Amazon FBA	Jun. 2024 – Jan. 2026 Bengaluru, India
• Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying security principles for compliance. • Analyzed seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, demonstrating data encryption and access control best practices. • Documented audit-ready case documentation, recording investigation findings, decisions, evidence, and corrective actions to mitigate repeat-issue investigation time. • Identified recurring fraud patterns in 200+ weekly cases, reducing repeat-issue investigation time through early flagging and applying cybersecurity principles to prevent financial loss.	

Projects

Vulnerability Scanner and Patch Prioritization Engine	<i>Python, Bash, Nessus, OpenVAS, NVD API</i>
• Developed automated vulnerability assessment pipeline integrating Nessus and OpenVAS APIs in Python, generating CVE reports with CVSS severity and EPSS scoring from FIRST.org API. • Developed OWASP Top 10 automated web checker to detect injection, auth, and SSRF vulnerabilities via crafted HTTP requests. • Automated scan scheduling via Bash and cron; built delta-scan logic to flag new CVEs and calculate remediation deadlines (Critical=24hrs, High=7 days, Medium=30 days).	
SOC Automation and Threat Detection Lab	<i>Python, Splunk, Wireshark, Nmap, MITRE ATT&CK</i>
• Deployed Splunk SIEM with SPL searches for brute-force detection, lateral movement, and privilege escalation; mapped TTPs to MITRE ATT&CK (T1110, T1078, T1059) and wrote incident report. • Developed SOAR-style detection pipeline: Python script ingests Splunk alerts, enriches with VirusTotal API, and dispatches Telegram notifications with severity classification. • Converted Sigma rules from detection logic; analyzed TCP/IP traffic in Wireshark for SYN scans, DNS tunnelling, and plaintext credential exposure.
