Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 – 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 – 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 – 2018

Work Experience

Support Operations Specialist <i>Amazon FBA</i>	<i>Jun. 2024 – Jan. 2026 Bengaluru, India</i>
• Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured case triage, escalation, and decision workflows. • Investigated root cause of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers. • Maintained audit-ready case documentation recording investigation findings, decisions, evidence notes, and corrective actions. • Detected recurring fraud patterns across 200+ weekly cases and flagged them early, reducing repeat-issue investigation time before escalation.	

Projects

<u>Phishing and OSINT Threat Intelligence Tool</u>	<i>Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot</i>
• Developed multi-API threat intelligence pipeline using Python, submitting suspicious URLs/IPs to VirusTotal, AbuseIPDB, and URLScan.io, cross-referencing WHOIS registration age, DNS records, and SSL details for phishing analysis. • Implemented typosquatting domain detector generating character-substitution variants of brand domains and checking live DNS resolution for brand-impersonation analysis using Python, VirusTotal API, AbuseIPDB, and WHOIS. • Deployed Telegram bot interface enabling analysts to submit URLs for live IOC enrichment, supporting bulk CSV input/output for incident response workflows and including OSINT enrichment via theHarvester for domain profiling using Python, Telegram bot, and WHOIS.	
<u>Vulnerability Scanner and Patch Prioritization Engine</u>	<i>Python, Bash, Nessus, OpenVAS, NVD API</i>
• Built automated vulnerability assessment pipeline integrating Nessus and OpenVAS REST APIs in Python, generating CVE reports classified by CVSS severity and EPSS context from the FIRST.org API. • Developed OWASP Top 10 automated web checker that sends crafted HTTP requests to detect injection, broken auth, and SSRF vulnerabilities, documenting SQL injection exploit and parameterised query remediation using Python, Bash, and Nessus. • Automated scan scheduling via Bash and cron, building delta-scan logic to flag newly discovered CVEs and organize patch compliance tracking evidence using Python, Bash, and Nessus.	

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring
Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics
Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening
Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics
Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
