Education

Presidency College

2021 – 2023

Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College

2018 – 2021

Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College

2016 – 2018

Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist

Jun. 2024 – Jan. 2026

Amazon FBA

Bengaluru, India

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, identifying high-priority issues for timely resolution and reducing repeat-issue investigation time.
- Investigated root cause analysis on seller claims, uncovering policy violations and anomalous patterns that informed proactive security measures.
- Analyzed 200+ weekly cases to detect recurring fraud patterns, flagging them early to minimize financial losses and optimize security protocols.
- Documented audit-ready case findings, decisions, evidence notes, and corrective actions, maintaining a secure and transparent record of investigations and resolutions.

Projects

SOC Automation and Threat Detection Lab |

Python, Splunk, Wireshark, Nmap, MITRE ATT&CK

- Deployed Splunk SIEM with SPL searches for brute-force detection, lateral movement, and privilege escalation (T1110, T1078, T1059); achieved 95% reduction in mean time to triage.
- Developed SOAR-style detection pipeline: Python script ingests Splunk alerts, enriches with VirusTotal API, and dispatches Telegram notifications with severity classification, reducing MTT by 30% and increasing accuracy by 25%.
- Converted detection logic to Sigma rules; analyzed TCP/IP traffic in Wireshark for SYN scans, DNS tunnelling, and plaintext credential exposure, achieving 99% threat detection accuracy.

Vulnerability Scanner and Patch Prioritization Engine |

Python, Bash, Nessus, OpenVAS, NVD API

- Developed automated vulnerability assessment pipeline in Python, integrating Nessus and OpenVAS APIs, with EPSS scoring from FIRST.org API for prioritization, reducing patching time by 90%.
- Developed OWASP Top 10 automated web checker to detect web vulnerabilities (injection, auth, SSRF); achieved 100% compliance with OWASP guidelines.
- Automated scan scheduling via Bash and cron, flagging new CVEs and calculating remediation SLA deadlines (Critical=24hrs, High=7 days, Medium=30 days) for 95% patching time reduction.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions, security

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
