Education

Presidency College

2021 – 2023

Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College

2018 – 2021

Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College

2016 – 2018

Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist

Jun. 2024 – Jan. 2026

Amazon FBA

Bengaluru, India

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, identifying high-priority issues for timely resolution.
- Investigated seller claims, conducting root cause analysis to identify policy violations and anomalous patterns.
- Analyzed 200+ weekly cases to detect recurring fraud patterns, reducing repeat-issue investigation time through early flagging.
- Documented investigation findings, decisions, evidence notes, and corrective actions in audit-ready case files, ensuring transparency and accountability.

Projects

SOC Automation and Threat Detection Lab |

Python, Splunk, Wireshark, Nmap, MITRE ATT&CK

- Deployed Splunk SIEM with SPL correlation (detection engineering) searches for brute-force detection (`index=* failed | stats count by src_ip`), lateral movement, and privilege escalation; mapped TTPs to MITRE ATT&CK (TTP mapping) (T1110, T1078, T1059) and wrote PICERL incident report.
- Built automated SOAR (security orchestration and automation)-style detection pipeline: Python script ingests Splunk alerts, runs IOC enrichment (threat intelligence) via VirusTotal API, and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules (detection-as-code) (vendor-neutral format used by enterprise SOCs); performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling, and plaintext credential exposure on unencrypted sessions.

Phishing and OSINT Threat Intelligence Tool |

Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot

- Built multi-API threat intelligence pipeline: submits suspicious URLs/IPs to VirusTotal, AbuseIPDB, and URLScan.io; cross-references WHOIS registration age, DNS records, and SSL details for phishing analysis.
- Implemented typosquatting (brand impersonation detection) domain detector generating character-substitution variants of brand domains and checking live DNS resolution for brand-impersonation analysis.
- Deployed Telegram bot interface enabling analysts to submit URLs for live IOC enrichment (threat intelligence); supports bulk CSV input/output for incident response workflows and includes OSINT enrichment (open-source intelligence) via theHarvester for domain profiling.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
