Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, routing each through structured escalation workflow, achieving consistent compliance audit readiness.
- Investigated seller claims to determine root causes, identified policy violations and anomalous patterns, and escalated actionable findings to senior reviewers for timely resolution.
- Documented investigation findings, decisions, evidence notes, and corrective actions in audit-ready case files, ensuring traceable records for compliance reviews.
- Spotted recurring fraud patterns across 200+ weekly cases, flagging them early and reducing repeat-issue investigation time before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force, lateral movement and privilege escalation detection, mapped TTPs to MITRE ATT&CK framework and produced PICERL incident report.
- Developed Python script that consumes Splunk alerts, enriches indicators using MITRE ATT&CK knowledge base and generates structured notification payloads.
- Translated detection logic into Splunk SPL queries, validated traffic patterns with Wireshark analysis of SYN scans, DNS tunnelling and unencrypted credential exposure, and documented detection specifications.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Created Python pipeline that calls Nessus and OpenVAS REST APIs, aggregates findings and produces CVE report classified by CVSS severity and enriched with NVD vulnerability data.
- Implemented Bash script that leverages Nessus scanning templates to assess OWASP Top 10 web risks, identified injection and authentication flaws, and recorded SQL injection findings in a remediation document.
- Automated scan scheduling with Bash and cron, added delta-scan logic to flag newly discovered CVEs and organized patch compliance tracking evidence.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
