Work Experience

Support Operations Specialist Amazon FBA	Jun. 2024 – Jan. 2026 Bengaluru, India
• Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, ensuring compliance with structured workflows and regulatory requirements. • Conducted root cause analysis on seller claims, identifying policy violations and anomalous patterns, and escalated findings to senior reviewers for compliance management. • Maintained audit-ready case documentation, recording investigation findings, decisions, evidence notes, and corrective actions to support compliance tracking and governance. • Spotted recurring fraud patterns across 200+ weekly cases and flagged them early, reducing repeat-issue investigation time before escalation and improving compliance risk management.	

Projects

Phishing and OSINT Threat Intelligence Tool	<i>Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot</i>
• Built multi-API threat intelligence pipeline: submits suspicious data to VirusTotal, AbuseIPDB, and URLScan.io; cross-references WHOIS, DNS, and SSL details for unified phishing probability score. • Developed typosquatting detector generating domain variants and checking DNS resolution to catch brand-impersonation attacks before they reach threat feeds (EPSS 8/10). • Developed Telegram bot interface for live IOC enrichment, supporting bulk CSV input/output and OSINT enrichment via theHarvester for domain profiling.	
Vulnerability Scanner and Patch Prioritization Engine	<i>Python, Bash, Nessus, OpenVAS, NVD API</i>
• Developed automated vulnerability assessment pipeline integrating Nessus and OpenVAS APIs in Python, generating CVE reports with CVSS severity and EPSS scoring from FIRST.org API. • Developed OWASP Top 10 automated web checker to detect injection, auth, and SSRF vulnerabilities via crafted HTTP requests. • Automated scan scheduling via Bash and cron; built delta-scan logic to flag new CVEs and calculate remediation SLA deadlines (Critical=24hrs, High=7 days, Medium=30 days).
