Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflows, achieving consistent case routing compliance.
- Investigated seller claims to determine root causes, identified policy violations and anomalous activity, and escalated findings to senior reviewers for timely resolution.
- Documented investigation findings, decisions, evidence notes, and corrective actions in audit-ready records, supporting compliance audits and traceability.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force, lateral movement and privilege escalation detection, mapped TTPs to MITRE ATT&CK and produced a PICERL incident report.
- Created a Python automation that consumes Splunk alerts, enriches IOCs using MITRE ATT&CK knowledge and generates severity-classified tickets.
- Translated detection logic into Sigma rules for vendor-neutral deployment and produced a Wireshark analysis identifying SYN scans, DNS tunnelling and plaintext credential exposure.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built a Python pipeline that submits suspicious URLs and IPs to VirusTotal and AbuseIPDB, then cross-references WHOIS registration data, DNS records and SSL details for phishing analysis.
- Implemented a Python typosquatting detector that generates character-substitution variants of brand domains and checks live DNS resolution, logging findings for impersonation detection.
- Deployed a Python-based Telegram bot that accepts analyst-submitted URLs, enriches IOCs via VirusTotal and AbuseIPDB, retrieves WHOIS data and returns results in CSV format for incident response.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
