Work Experience

Support Operations Specialist

Jun. 2024 – Jan. 2026

Amazon FBA

Bengaluru, India

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, translating high-volume case review into structured investigation, escalation, and evidence documentation.
- Conducted root cause analysis on seller claims, identifying policy violations and anomalous patterns for pattern review and investigation handoffs.
- Maintained audit-ready case documentation with findings, decisions, evidence notes, and corrective actions aligned to evidence documentation and decision trails.
- Spotted recurring fraud patterns across 200+ weekly cases and flagged repeat issues early, reducing investigation cycles before escalation.

Projects

SOCAutomation and Threat Detection Lab |

Python, Splunk, Wireshark, Nmap, MITRE ATT&CK

- Deployed Splunk SIEM with SPL searches for brute-force detection, lateral movement, and privilege escalation, mapped to MITRE ATT&CK TTPs and wrote incident report in PICERL format.
- Developed Python pipeline: ingested Splunk alerts, enriched with VirusTotal IOC data, and dispatched Telegram notifications with CVSS severity classification.
- Converted detection logic to Sigma rules; analyzed TCP/IP packets in Wireshark for SYN scans, DNS tunnelling, and plaintext credential exposure.

Vulnerability Scanner and Patch Prioritization Engine |

Python, Bash, Nessus, OpenVAS, NVD API

- Integrated Nessus and OpenVAS APIs in Python to build automated vulnerability pipeline; generated CVE reports with CVSS severity and EPSS context from FIRST.org API.
- Developed OWASP Top 10 automated web checker to detect injection, auth, and SSRF vulnerabilities, documenting SQL injection exploit and remediation in a structured format.
- Scheduled scans via Bash and cron; built delta-scan logic for new CVEs, prioritized remediation tracking by severity.
