## Education

**Presidency College** *2021 – 2023*
*Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India*

**St. Claret College** *2018 – 2021*
*Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India*

**St. Claret PU College** *2016 – 2018*
*Higher Secondary (12th) · Bengaluru, India*

## Work Experience

**Support Operations Specialist** *Jun. 2024 – Jan. 2026*
*Amazon FBA* *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured triage, escalation, and decision workflows, processing 50+ cases per week
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, escalating 30+ cases weekly
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, maintaining compliant logs for 50+ cases each week
- Detected recurring fraud patterns across 200+ weekly cases, flagged early and reduced repeat-issue investigation time before escalation, cutting repeat investigations by 15%

## Projects

**SOC Automation and Threat Detection Lab** | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute force detection, lateral movement and privilege escalation, mapped TTPs to MITRE ATT&CK framework and generated PICERL incident report.
- Built Python automation that consumes Splunk alerts, triggers Nmap scans for host validation, enriches findings with MITRE ATT&CK mapping and logs results to Splunk.
- Translated detection logic into Sigma rule format for vendor neutral deployment, captured TCP SYN scan and DNS tunnelling patterns using Wireshark and validated endpoints with Nmap, stored rules in Splunk app repository.

**Phishing and OSINT Threat Intelligence Tool** | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Created Python pipeline that submits URLs and IPs to VirusTotal and AbuseIPDB, retrieves WHOIS registration and DNS data, and returns enriched threat intelligence via Telegram bot.
- Developed Python typosquatting detector that generates character substitution variants of brand domains, queries DNS records and WHOIS information to identify active impersonating domains.
- Implemented Telegram bot interface in Python allowing analysts to upload URLs or CSV lists, performs bulk WHOIS and VirusTotal lookups and returns enriched IOC data for incident response.

## Technical Skills

**SOC Operations:** Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
**SIEM & Monitoring:** Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
**Threat Intelligence:** MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
**Systems & Networking:** Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
**Automation:** Python, Bash (basic), regular expressions

## Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
