Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for security review.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a traceable security evidence repository.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built an automated vulnerability assessment pipeline using Python to call Nessus and OpenVAS REST APIs, retrieved CVE data from the NVD API, and enriched each finding with EPSS context from the FIRST.org API, producing a detailed CVE report.
- Developed an OWASP Top 10 web checker in Python that sends crafted HTTP requests to identify injection, broken authentication, and SSRF flaws, and documented a SQL injection exploit together with a parameterised query remediation.
- Automated scan scheduling with Bash and cron, implemented delta-scan logic to flag newly discovered CVEs, and organized patch compliance tracking evidence for each vulnerability.

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force attempts, lateral movement, and privilege escalation, mapped the detected TTPs to MITRE ATT&CK, and generated a comprehensive incident report.
- Built an automated detection pipeline in Python that ingests Splunk alerts, enriches IOCs via the VirusTotal API, and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules for vendor-neutral use, performed TCP/IP analysis in Wireshark to identify SYN scans, DNS tunnelling, and plaintext credential exposure, and documented the findings in a detailed analysis.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
