Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 – 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 – 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 – 2018

Work Experience

Support Operations Specialist <i>Amazon FBA</i>	<i>Jun. 2024 – Jan. 2026 Bengaluru, India</i>
• Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured case triage discipline • Investigated seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for informed decision-making. • Maintained audit-ready case documentation recording investigation findings, decisions, evidence notes, and corrective actions • Detected recurring fraud patterns across 200+ weekly cases and flagged them early, reducing repeat-issue investigation time before escalation.	

Projects

Structured Investigation and Evidence Documentation Lab <i>Python, Splunk, Wireshark, Nmap, MITRE ATT&CK</i>
• Developed structured investigation workflow using Splunk SIEM with SPL correlation searches for brute-force detection, lateral movement, and privilege escalation; mapped Tactics, Techniques, and Procedures (TTPs) to MITRE ATT&CK and created incident report in PICERL format. • Built automated detection pipeline using Python script that ingests Splunk alerts, runs IOC enrichment via VirusTotal API, and dispatches Telegram notifications with severity classification based on CVSS severity classification. • Converted detection logic to Sigma rules for vendor-neutral format used by enterprise SOCs; performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling, and plaintext credential exposure on unencrypted sessions.
Vulnerability Scanner and Patch Prioritization Engine <i>Python, Bash, Nessus, OpenVAS, NVD API</i>
• Integrated Nessus and OpenVAS REST APIs in Python to build automated vulnerability assessment pipeline; generated CVE reports classified by CVSS severity and EPSS context from the FIRST.org API. • Developed OWASP Top 10 automated web checker that sends crafted HTTP requests to detect injection, broken auth, and SSRF vulnerabilities; documented SQL injection exploit and parameterised query remediation. • Automated scan scheduling via Bash and cron; built delta-scan logic to flag newly discovered CVEs and organized patch compliance tracking evidence.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
