Work Experience

Support Operations Specialist

Amazon FBA

Jun. 2024 – Jan. 2026

Bengaluru, India

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, translating high-volume case review into structured investigation, escalation, and evidence documentation.
- Conducted root cause analysis on seller claims, identifying policy violations and anomalous patterns for pattern review and investigation handoffs.
- Maintained audit-ready case documentation with findings, decisions, evidence notes, and corrective actions aligned to evidence documentation and decision trails.
- Spotted recurring fraud patterns across 200+ weekly cases and flagged repeat issues early, reducing investigation cycles before escalation.

Projects

Vulnerability Scanner and Patch Prioritization Engine |

Python, Bash, Nessus, OpenVAS, NVD API

- Developed automated application security testing pipeline integrating Nessus and OpenVAS APIs in Python, generating vulnerability reports with EPSS context from FIRST.org API.
- Developed OWASP Top 10 automated security checker detecting injection, SSRF, and XSS vulnerabilities; documented SQL injection exploit-to-remediation workflow with parameterised query fixes.
- Automated security scan scheduling via Bash and cron integrated with development cycles; built delta-scan logic to flag newly introduced CVEs for secure development lifecycle tracking.

SOC Automation and Threat Detection Lab |

Python, Splunk, Wireshark, Nmap, MITRE ATT&CK

- Deployed Splunk SIEM with SPL correlation searches for brute-force detection, lateral movement, and privilege escalation; mapped TTPs to MITRE ATT&CK and wrote PICERL incident report.
- Developed SOAR-style detection pipeline: Python script ingests Splunk alerts, enriches with VirusTotal API, and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules; analyzed TCP/IP traffic in Wireshark for SYN scans, DNS tunnelling, and plaintext credential exposure.
