Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, achieving consistent case routing compliance.
- Investigated seller claims to determine root causes, identified policy violations and anomalous activity, and escalated findings to senior reviewers for timely action.
- Documented investigation findings, decisions, evidence notes, and corrective actions in audit-ready records, supporting compliance reviews and traceability.
- Spotted recurring fraud patterns across 200+ weekly cases, flagging them early and cutting repeat-issue investigation time before escalation by 15%.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute-force detection, lateral movement and privilege escalation, incorporated Nmap scan data for asset discovery, mapped TTPs to MITRE ATT&CK and produced a PICERL incident report.
- Created Python automation that consumes Splunk alerts, triggers Nmap scans for host verification, enriches findings with MITRE ATT&CK technique references, and generates structured severity classification logs.
- Translated existing detection logic into Sigma rules for vendor-neutral deployment and used Wireshark packet captures and Nmap scans to validate SYN scan and DNS tunnelling signatures, delivering a Sigma rule set.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built Python pipeline that submits suspicious URLs and IPs to VirusTotal and AbuseIPDB, retrieves WHOIS registration age and DNS records, and compiles a phishing analysis report.
- Implemented Python typosquatting detector that generates character-substitution variants of brand domains, queries live DNS resolution via WHOIS data and flags impersonating entries in a typosquatting detection list.
- Deployed Telegram bot written in Python allowing analysts to submit URLs, which triggers bulk WHOIS lookups and VirusTotal checks, returning results through an OSINT enrichment module.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
