Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow for endpoint security incident handling process
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers for security incident response escalation report
- Documented audit-ready case files with investigation findings, evidence notes, and corrective actions, creating a searchable security documentation repository
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute force detection, lateral movement and privilege escalation and mapped the observed tactics and techniques to MITRE ATT&CK, producing a reusable correlation search library.
- Built an automated detection pipeline in Python that ingests Splunk alerts, enriches indicators of compromise via the VirusTotal API and dispatches Telegram notifications with severity classification, delivering a fully scripted enrichment pipeline script.
- Converted detection logic into Sigma rules for vendor neutral use, performed TCP/IP analysis in Wireshark to identify SYN scans, DNS tunnelling and plaintext credential exposure, and generated a comprehensive Sigma rule set.

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built a multi-API threat intelligence pipeline in Python that submits suspicious URLs and IPs to VirusTotal, AbuseIPDB and URLScan.io, cross-references WHOIS registration age, DNS records and SSL details for phishing analysis, resulting in a threat intel aggregation module.
- Implemented a typosquatting domain detector in Python that generates character-substitution variants of brand domains and checks live DNS resolution for brand-impersonation, producing a continuously updated typosquatting detection list.
- Deployed a Telegram bot interface that enables analysts to submit URLs for live IOC enrichment, supports bulk CSV input and output for incident response workflows and incorporates OSINT enrichment via WHOIS lookups, delivering a bot command library.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis

SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark

Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain

Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts

Automation: Python, Bash (basic), regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
