Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, producing an audit-ready case queue.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, generating compliance escalation reports.
- Documented investigation findings, decisions, evidence notes, and corrective actions in audit-ready case files, creating a control evidence repository.
- Identified recurring fraud patterns across case history and flagged them ahead of weekly review cycles, cutting repeat-issue re-investigation before escalation.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM and created SPL correlation searches for brute force detection, lateral movement, and privilege escalation; mapped TTPs to MITRE ATT&CK and generated a PICERL incident report.
- Built an automated detection pipeline using Python to ingest Splunk alerts, enrich IOCs via VirusTotal API, and dispatch Telegram notifications with severity classification.
- Converted detection logic to Sigma rules for vendor-neutral SOC use and performed TCP/IP analysis in Wireshark to identify SYN scans, DNS tunnelling, and plaintext credential exposure, producing a Wireshark analysis report.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Implemented an automated vulnerability assessment pipeline that integrates Nessus and OpenVAS REST APIs in Python and generates CVE reports classified by CVSS severity with EPSS context from the FIRST.org API.
- Developed an OWASP Top 10 web checker that sends crafted HTTP requests to detect injection, broken authentication, and SSRF vulnerabilities and documented a SQL injection exploit with remediation steps.
- Automated scan scheduling using Bash and cron, added delta-scan logic to flag newly discovered CVEs, and organized patch compliance tracking evidence.
