Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 – 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 – 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 – 2018

Work Experience

Support Operations Specialist <i>Amazon FBA</i>	<i>Jun. 2024 – Jan. 2026 Bengaluru, India</i>
• Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage discipline to prioritize high-risk cases for senior reviewer escalation. • Investigated seller claims, identified policy violations and anomalous patterns through root cause analysis, and escalated findings to senior reviewers for timely decision-making. • Maintained audit-ready case documentation, recording investigation findings, decisions, evidence notes, and corrective actions • Detected recurring fraud patterns across 200+ weekly cases, flagging them early to reduce repeat-issue investigation time and prevent policy exception escalation.	

Projects

Risk Analyst | *risk, risk identification, risk prioritization, Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Created audit-ready case notes for control evidence by integrating risk identification and risk prioritization: analyzed suspicious URLs/IPs via VirusTotal, AbuseIPDB, and URLScan.io, and cross-referenced WHOIS registration age, DNS records, and SSL details for phishing analysis.
- Developed risk-based policy exception handling by generating character-substitution variants of brand domains and checking live DNS resolution for brand-impersonation analysis using AbuseIPDB and WHOIS.
- Deployed risk-focused decision trails by enabling analysts to submit URLs for live IOC enrichment via a Telegram bot interface; supported bulk CSV input/output for incident response workflows and included OSINT enrichment via theHarvester for domain profiling.

Risk Analyst | *risk, risk identification, risk prioritization, Python, Bash, Nessus, OpenVAS, NVD API, FIRST.org API*

- Built automated risk assessment pipeline integrating Nessus and OpenVAS REST APIs in Python; generated CVE reports classified by CVSS severity and EPSS context from the FIRST.org API for control gap analysis.
- Developed risk-based OWASP Top 10 automated web checker that sends crafted HTTP requests to detect injection, broken auth, and SSRF vulnerabilities; documented SQL injection exploit and parameterised query remediation for escalation priorities.
- Automated risk-focused scan scheduling via Bash and cron; built delta-scan logic to flag newly discovered CVEs and organize patch compliance tracking evidence for control gap analysis.

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring
Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics
Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening
Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics
Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
