Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 – 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 – 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 – 2018

Work Experience

Support Operations Specialist Amazon FBA	Jun. 2024 – Jan. 2026 Bengaluru, India
• Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured case triage and escalation workflows, resulting in timely and accurate decision-making. • Investigated root cause analysis on seller claims, identifying policy violations and anomalous patterns, and escalated findings to senior reviewers, leading to informed decision-making. • Analyzed 200+ weekly cases to spot recurring fraud patterns, flagging them early to reduce repeat-issue investigation time before escalation, resulting in efficient issue resolution. • Documented audit-ready case records, capturing investigation findings, decisions, evidence notes, and corrective actions, ensuring transparent and accountable case management.	

Projects

SOC Automation and Threat Detection Lab	<i>Python, Splunk, Wireshark, Nmap, MITRE ATT&CK</i>
• Deployed Splunk SIEM with SPL searches for brute-force detection, lateral movement, and privilege escalation; mapped TTPs to MITRE ATT&CK and wrote PICERL incident report using Python, Splunk, and Wireshark. • Developed SOAR-style detection pipeline: ingested Splunk alerts, enriched with VirusTotal IOC data, and dispatched Telegram notifications with severity classification. • Converted detection logic to Sigma rules; analyzed TCP/IP traffic in Wireshark for SYN scans, DNS tunnelling, and plaintext credential exposure.	
Vulnerability Scanner and Patch Prioritization Engine	<i>Python, Bash, Nessus, OpenVAS, NVD API</i>
• Integrated Nessus and OpenVAS REST APIs in Python to generate CVE reports with CVSS severity and EPSS context from FIRST.org API. • Developed OWASP Top 10 automated web checker using Python, Bash, and NVD API to detect injection, auth, and SSRF vulnerabilities. • Automated scan scheduling via Bash and cron; built delta-scan logic to flag new CVEs and track remediation using Bash, Nessus, and OpenVAS.	

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, firewall and IDS/IPS concepts
Automation: Python, Bash (basic), regular expressions, security

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
