Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow to support security incident handling, producing consistent case disposition logs.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, enabling timely cyber risk mitigation.
- Documented audit-ready case records with investigation findings, evidence notes, and corrective actions, creating a compliant evidence repository for 50+ weekly cases.
- Detected recurring fraud patterns across 200+ weekly cases, flagging them early and reducing repeat-issue investigation time before escalation, improving detection efficiency.

Projects

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline in Python that submits suspicious URLs and IPs to VirusTotal, AbuseIPDB, and URLScan.io and cross-references WHOIS registration age, DNS records, and SSL details to generate a phishing analysis report.
- Implemented a typosquatting domain detector in Python that generates character-substitution variants of brand domains and checks live DNS resolution to produce a typosquatting detection list.
- Deployed a Telegram bot interface in Python that enables analysts to submit URLs for live IOC enrichment, supports bulk CSV input and output, and adds OSINT enrichment via theHarvester to deliver an enriched IOC package.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built an automated vulnerability assessment pipeline in Python that integrates Nessus and OpenVAS REST APIs, pulls CVE data from the NVD API, and classifies findings by CVSS severity and EPSS context to produce a comprehensive CVE report.
- Developed an OWASP Top 10 automated web checker in Python that sends crafted HTTP requests to detect injection, broken authentication, and SSRF vulnerabilities and documents each finding with a sample exploit and remediation guidance.
- Automated scan scheduling with Bash and cron, added delta-scan logic to flag newly discovered CVEs, and organized patch compliance tracking evidence into a structured audit-ready documentation set.

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring

Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics

Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening

Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics

Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
