Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 – 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 – 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 – 2018

Work Experience

Support Operations Specialist <i>Amazon FBA</i>	<i>Jun. 2024 – Jan. 2026 Bengaluru, India</i>
• Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, following structured case triage, escalation, and decision workflows. • Investigated seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers. • Maintained audit-ready case documentation recording investigation findings, decisions, evidence notes, and corrective actions. • Detected recurring fraud patterns across 200+ weekly cases and flagged them early, reducing repeat-issue investigation time before escalation.	

Projects

Phishing and OSINT Threat Intelligence Tool <i>Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot</i>
• Rewrote a multi-API threat intelligence pipeline using Python, submitting suspicious URLs/IPs to VirusTotal, AbuseIPDB, and URLScan.io, and cross-referencing WHOIS registration age, DNS records, and SSL details for phishing analysis. • Implemented a typosquatting domain detector using Python, generating character-substitution variants of brand domains and checking live DNS resolution for brand-impersonation analysis. • Deployed a Telegram bot interface using Python and the Telegram bot API, enabling analysts to submit URLs for live IOC enrichment, supporting bulk CSV input/output for incident response workflows, and including OSINT enrichment via theHarvester for domain profiling.
Vulnerability Scanner and Patch Prioritization Engine <i>Python, Bash, Nessus, OpenVAS, NVD API</i>
• Built an automated vulnerability assessment pipeline using Python, integrating Nessus and OpenVAS REST APIs, and generating CVE reports classified by CVSS severity and EPSS context from the FIRST.org API. • Developed an OWASP Top 10 automated web checker using Python, sending crafted HTTP requests to detect injection, broken auth, and SSRF vulnerabilities, and documenting SQL injection exploit and parameterised query remediation. • Automated scan scheduling using Bash and cron, and built delta-scan logic to flag newly discovered CVEs and organize patch compliance tracking evidence.

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring
Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics
Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening
Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics
Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
