Education

Presidency College <i>Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India</i>	2021 – 2023
St. Claret College <i>Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India</i>	2018 – 2021
St. Claret PU College <i>Higher Secondary (12th) · Bengaluru, India</i>	2016 – 2018

Work Experience

Support Operations Specialist Amazon FBA	Jun. 2024 – Jan. 2026 Bengaluru, India
--	---

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, prioritizing risk and ensuring timely resolution.
- Investigated seller claims, identifying policy violations and anomalous patterns to mitigate operational risk.
- Analyzed 200+ weekly cases to detect recurring fraud patterns, reducing repeat-issue investigation time by early flagging.
- Documented audit-ready case notes, including investigation findings, decisions, evidence, and corrective actions, ensuring compliance tracking and decision trails.

Projects

<u>Risk-based Operational Control Evidence Creation</u>	<i>Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot</i>
--	---

- Developed audit-ready case notes with decision trails, evidence notes, and corrective actions for risk identification and control gap analysis, resulting in 95% documentation completeness.
- Implemented pattern recognition and repeat-issue flagging for anomaly detection at scale, reducing escalation priorities by 30% and improving risk prioritization.
- Created decision trails and evidence notes for policy-based risk triage, ensuring 100% compliance tracking and risk-based remediation.

<u>Risk-based Vulnerability Assessment and Patch Prioritization</u>	<i>Python, Bash, Nessus, OpenVAS, NVD API</i>
--	---

- Built automated vulnerability assessment pipeline integrating Nessus and OpenVAS REST APIs in Python, generating CVE reports classified by CVSS severity (vulnerability prioritisation) and prioritizing by EPSS scoring (exploit probability scoring) from FIRST.org API, resulting in 25% reduction in patching time.
- Developed OWASP Top 10 (web application security) automated web checker that detects injection, broken auth, and SSRF vulnerabilities, documenting SQL injection exploit and parameterised query remediation, and reducing vulnerability density by 15%.
- Automated scan scheduling via Bash and cron, built delta-scan logic to flag newly discovered CVEs, and calculated remediation SLA deadlines (Critical=24hrs, High=7 days, Medium=30 days) for patch compliance (remediation tracking) tracking, resulting in 99% on-time patching.

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring

Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics

Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening

Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics

Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
