Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage, escalation and decision workflows; output: daily case triage report.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers; output: escalation docket of 30+ cases.
- Documented audit-ready case records capturing investigation findings, evidence notes and corrective actions for each case; output: compliant documentation repository of 1,000+ entries.
- Spotted recurring fraud patterns across 200+ weekly cases, flagging them early to reduce repeat-issue investigation time before escalation; output: early-alert list of 15 high-risk patterns.

Projects

SOC Automation and Threat Detection Lab | *Python, Splunk, Wireshark, Nmap, MITRE ATT&CK*

- Deployed Splunk SIEM with SPL correlation searches for brute force detection, lateral movement and privilege escalation and mapped TTPs to MITRE ATT&CK resulting in a PICERL incident report.
- Built an automated detection pipeline where a Python script ingests Splunk alerts, enriches IOCs via the VirusTotal API and dispatches Telegram notifications with severity classification.
- Converted detection logic to Sigma rules for vendor neutral use and performed TCP/IP analysis in Wireshark to detect SYN scans, DNS tunnelling and plaintext credential exposure, producing detailed exposure detection documentation.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Created an automated vulnerability assessment pipeline that integrates Nessus and OpenVAS REST APIs in Python and generates CVE reports classified by CVSS severity with EPSS context from the FIRST.org API.
- Developed an OWASP Top 10 web checker that sends crafted HTTP requests to identify injection, broken authentication and SSRF vulnerabilities and documented a SQL injection exploit with remediation steps.
- Automated scan scheduling using Bash and cron, built delta-scan logic to flag newly discovered CVEs and organized patch compliance tracking evidence.

Technical Skills

SOC Operations: Alert triage, incident investigation, log analysis, threat detection, escalation, false positive analysis
SIEM & Monitoring: Splunk (SPL), Elastic SIEM (basic), Windows Event Logs, Sysmon, Wireshark
Threat Intelligence: MITRE ATT&CK, IOC analysis, VirusTotal, OSINT enrichment, Cyber Kill Chain
Systems & Networking: Windows internals, Linux fundamentals, TCP/IP, DNS, HTTP/S, IDS/IPS, AWS (IAM, CloudTrail, GuardDuty), cloud security posture
Automation: Python, Bash (basic), boto3, regular expressions

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
