Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying structured triage and escalation workflow, producing audit-ready case queue.
- Investigated root causes of seller claims, identified policy violations and anomalous patterns, and escalated findings to senior reviewers, resulting in documented escalation packets.
- Documented investigation findings, decisions, evidence notes, and corrective actions in audit-ready records, creating a compliant case repository used for compliance reviews.
- Detected recurring fraud patterns across 200+ weekly cases, flagged early and reduced repeat-issue investigation time before escalation, establishing a pattern-alert register.

Projects

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline in Python that submits suspicious URLs and IPs to VirusTotal, AbuseIPDB and URLScan.io, cross-references WHOIS registration age, DNS records and SSL details, and generates enriched threat analysis reports.
- Implemented typosquatting domain detector in Python that creates character-substitution variants of brand domains, checks live DNS resolution for each variant, and produces a typosquatting detection list for brand-impersonation analysis.
- Deployed a Telegram bot interface written in Python that accepts analyst-submitted URLs, enriches them with OSINT data via theHarvester, supports bulk CSV input and output, and delivers real-time IOC enrichment reports.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built automated vulnerability assessment pipeline in Python that integrates Nessus and OpenVAS REST APIs, pulls CVE data from the NVD API, adds CVSS severity and EPSS context from the FIRST.org API, and outputs comprehensive CVE reports with EPSS scores.
- Developed OWASP Top 10 automated web checker in Python that sends crafted HTTP requests to detect injection, broken authentication and SSRF flaws, documents a SQL injection proof-of-concept and records remediation steps.
- Automated scan scheduling using Bash and cron, added delta-scan logic to flag newly discovered CVEs, and compiled patch compliance tracking evidence for each identified vulnerability.

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring

Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics

Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening

Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics

Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
