Education

Presidency College *2021 – 2023*
Master of Computer Applications (MCA) · CGPA 7.29 · Bengaluru, India

St. Claret College *2018 – 2021*
Bachelor of Computer Applications (BCA) · CGPA 7.21 · Bengaluru, India

St. Claret PU College *2016 – 2018*
Higher Secondary (12th) · Bengaluru, India

Work Experience

Support Operations Specialist *Jun. 2024 – Jan. 2026*
Amazon FBA *Bengaluru, India*

- Triaged 50+ weekly inventory reimbursement cases by severity and policy eligibility, applying risk-based prioritization and escalation workflow, achieving audit-ready case readiness.
- Investigated root causes of seller claims, identified policy violations and anomalous risk patterns, and escalated findings to senior reviewers for remediation tracking.
- Documented investigation findings, decisions, evidence notes, and corrective actions in audit-ready case files, creating a compliant control evidence trail.
- Spotted recurring fraud patterns across 200+ weekly cases, flagging high-risk incidents early and reducing repeat-issue investigation time by 30% before escalation.

Projects

Phishing and OSINT Threat Intelligence Tool | *Python, VirusTotal API, AbuseIPDB, WHOIS, Telegram bot*

- Built multi-API threat intelligence pipeline using Python, VirusTotal API, AbuseIPDB, WHOIS, and Telegram bot to submit suspicious URLs and IPs, cross-reference WHOIS registration age, DNS records, and SSL details for phishing analysis, producing a consolidated threat report.
- Implemented typosquatting domain detector in Python that generates character-substitution variants of brand domains and checks live DNS resolution using WHOIS and Telegram bot, generating a list of potential brand-impersonation domains.
- Deployed Telegram bot interface in Python enabling analysts to submit URLs for live IOC enrichment, supporting bulk CSV input/output and incorporating WHOIS and DNS data for incident response workflows, producing enriched IOC datasets.

Vulnerability Scanner and Patch Prioritization Engine | *Python, Bash, Nessus, OpenVAS, NVD API*

- Built automated vulnerability assessment pipeline in Python integrating Nessus and OpenVAS REST APIs, generating CVE reports classified by CVSS severity and EPSS context from the FIRST.org API, producing a vulnerability inventory.
- Developed OWASP Top 10 automated web checker in Bash that sends crafted HTTP requests to detect injection, broken authentication, and SSRF vulnerabilities, documenting SQL injection exploits and parameterised query remediation, producing a vulnerability remediation guide.
- Automated scan scheduling via Bash and cron, built delta-scan logic to flag newly discovered CVEs and organize patch compliance tracking evidence, producing a patch status dashboard.

Technical Skills

GRC & Compliance: NIST CSF, ISO 27001, PCI-DSS, GDPR/PDPB, SOX/ITGC, compliance monitoring

Risk & Audit: Risk assessment, control testing, audit documentation, vendor risk, RCSA basics

Fraud & AML: Transaction monitoring, AML typologies, KYC/CDD, sanctions screening

Systems & Tools: Windows internals, Linux fundamentals, Python, Excel, SQL (basic), TCP/IP basics

Frameworks: MITRE ATT&CK, OWASP Top 10, Incident Response (PICERL), audit trail documentation

Certifications

- CompTIA Security+ SY0-701 — in progress, exam target Q3 2026
- Cisco Networking Academy — Introduction to Networking · Introduction to Cybersecurity
